

# BIOLEMON

## Multi-surface biological detergent

### BIOTECHNOLOGICAL SPECIALITIES

#### GROUPS

**BIOLEMON** is one of the new generation of **BIOTEL** products that combine the effectiveness of traditional chemical solutions with the advantages provided by biotech components, such as enzymes.

**BIOLEMON** is a detergent whose composition includes amylases and proteases. As a result, it is highly effective at in-depth cleaning.

**BIOLEMON** is suitable for cleaning all kinds of surfaces: floors, walls, toilets, plastic coverings, etc. It is particularly recommended for groups, road cleaning, rubbish bin cleaning and in the ship industry.

#### ADVANTAGES

- Cleans, degreases and prevents bad smells.
- Leaves a pleasant lemon smell on clean surface.
- High capacity to sanitise.
- Its effectiveness increases in successive applications.
- Does not lead to build-ups or blockages.
- Does not contain chlorine or quaternary ammonium compounds.
- Non-corrosive, non-flammable product.

#### DOSAGE AND INSTRUCTIONS FOR USE

**BIOLEMON** can be applied manually or mechanically.

**BIOLEMON** is an enzymatic detergent that does not contain microorganisms and therefore is suitable for use on surfaces that are in contact with foodstuffs. It does not contaminate surfaces microbiologically, or foodstuffs that may be handled on them.

The precautions that should be taken are the same as with any other kind of product: surfaces that come into contact with foodstuffs should be rinsed thoroughly to avoid chemical contamination.

- Manual use: dilute in water (preferably warm) to 0.5%. Carry out the cleaning using conventional systems. For very dirty surfaces, increase the concentration of the product and leave the cleaning solution to act for 10-20 minutes.
- Mechanical use: dissolve the product from 0.5 to 1%. Apply with particular care to the dirtiest areas.
- Bins: use 0.5 litres of the product for every 4,000 litres of water contained in the cistern.

## **CHARACTERISTICS**

- |               |           |
|---------------|-----------|
| – Appearance: | Liquid    |
| – Odour:      | Lemon     |
| – pH:         | 7.5 – 8.5 |

## **SAFETY**

Neutral product, to be handled with the same precautions as any concentrated detergent/degreasing agent. In the event of contact with skin or eyes, wash thoroughly with water. Keep out of the reach of children.

For further information, see the product's safety data sheet.

## **PACKAGING**

Boxes containing four 5-kg bottles.

Non-returnable packs.
