

BIOTECHNOLOGICAL SPECIALITIES

GROUPS

BIOLIMP is one of the new generation of **BIOTEL[®]** products that combine the effectiveness of traditional chemical solutions with the advantages provided by biotech components, such as enzymes.

BIOLIMP is a liquid biological formula based on biodegradable surfactants, organic acids and enzymes.

Its strong, balanced composition makes **BIOLIMP** the most suitable descaling product for cleaning and returning the shine to all kinds of surfaces, including WCs, shower screens, sinks and baths.

ADVANTAGES

- Product with strong descaling capacity.
- Allergen free.
- Economical to use.
- Does not contain chlorinated compounds.
- Highly biodegradable.

DOSAGE AND INSTRUCTIONS FOR USE

Spray on surface. Rinse off with water or a wet cloth.

Natural product comprised of proteases that easily degrade, dissolve and eliminate any kind of scale or dirt in general. High descaling power.

With substances derived from renewable resources. Natural superconcentrated product.

Shake before use.

PRECAUTIONS: Avoid contact between Biolimp[®] and chlorinated products (bleaches) or alkalis (degreasing agents).

Close the pack well after use. Store in a cool, dry place between 1 and 40°C.

CHARACTERISTICS

Appearance:	Yellow liquid
Odour:	Citrus
pH:	2.0 – 3.0

SAFETY

See product safety information sheet.

PACKAGING

Boxes contain 12 500-ml bottles with spray.
Non-returnable packs.
