

TECHNICAL INFORMATION AND SPECIFICATIONS**MICRODOR® BODY****Product description:**

Microdor® body is specially formulated for use on pets, as it respects the animal's bacterial flora and the natural pH of the skin. **Microdor® body** leaves a pleasant, neutral smell on the animal, but is not a perfume: it deodorises by capturing the molecules that are responsible for the odour.

Manufactured from substances derived from renewable resources of natural origin.

The action of zinc salt eliminates odours instead of just covering them up. Zinc is an essential trace element, with many beneficial functions for animals, including improving their appearance, skin and the quality of their fur.

Instructions for use and dosage:

Spray onto the animal's fur once a day. If necessary, apply more frequently. Avoid the eyes, nose, mucous membranes, sensitive areas and open wounds.

Specifications:

Appearance: Liquid	Density (g/ml): 0.99 ± 0.02
Colour: Colourless	pH (100%): 6.5 ± 0.3
Odour: Pleasant.	

Handling and precautions:

Storage: Keep in a cool, dry place between 4 and 40°C.
