

MICRODOR[®] EXPERT

Biological odour control

BIOTECHNOLOGICAL SPECIALITIES

GROUPS

Microdor[®] expert is a liquid formulation comprised of selected natural microorganisms, surfactants and perfuming agents.

Its special formulation makes it particularly effective for preventing and eliminating odours due to the build-up of organic residues.

Microdor[®] expert is a biodegradable product.

Microdor[®] expert is formulated with strictly non-pathogenic microorganisms, according to European Directive 2000/54/EC.

USE

Microdor[®] expert can be applied at all points where odours are generated.

Microdor[®] expert eliminates odours from suits, shoes, bedspreads, upholstery, car interiors, moulds and damp, bins, curtains, carpets and rugs, among other items.

ADVANTAGES

Deodorizes rooms and surfaces.

Immediate action due to the combination of surfactants and perfuming agents.

Deep action due to microorganisms that can digest complex fats, oils, cellulose, proteins, starch, etc., and destroy the source of odours.

Does not contain caustic soda.

Highly stable and can be kept for long periods.

Non-flammable product. Non-toxic, non-corrosive.

RECOMMENDATIONS FOR USE

Spray directly onto the surface. Repeat the operation until the odour is removed. Does not stain or attack any kind of textile or surface. Suitable for eliminating odours from suits, shirts, coats, mountain boots, ski boots, sports shoes, curtains, carpets, rugs, bedspreads, sheets, upholstery, bins, and any corner with mould and damp. In all cases, you can rinse off with as much water as you want, although this step is not required.

With substances derived from renewable resources.

Natural superconcentrated product.

As in all anti-odour treatments, the use of **Microdor[®] expert** should be increased the greater the accumulation of residue to be treated or the intensity of the odours to be removed.

Microdor® expert can also be used to clean surfaces affected by residues/odours, when diluted in water in the proportions given above.

Once dissolved in water, the product should be used within a maximum of 24 hours.

PRECAUTIONS: Avoid direct contact between **Microdor® expert** and acidic chemical products (hydrochloric acid, descaling agents, etc.), degreasing agents and disinfectants (bleach).

CHARACTERISTICS

Appearance:	Opaque light green liquid
Odour:	Perfumed
pH:	6.0 – 8.5
Bacterial count:	10 billion microorganisms per litre

SAFETY

See product safety information sheet.
