

MICRODOR[®] PRO

Biological odour control

BIOTECHNOLOGICAL SPECIALITIES

GROUPS

Microdor[®] Pro is a liquid formulation comprised of selected natural microorganisms, surfactants and perfuming agents.

Its special formulation makes it particularly effective for preventing and eliminating odours due to the build-up of organic residues.

Microdor[®] Pro is a biodegradable product.

Microdor[®] Pro is formulated with strictly non-pathogenic microorganisms, according to European Directive 2000/54/EC.

USE

Microdor[®] Pro can be used in all establishments where bad odours may occur, such as hotels, restaurants, old people's homes, schools.

Microdor[®] Pro removes smells from urinals, pipes, carpets, animal beds, rubbish containers and bin storage rooms, vehicles, etc.

ADVANTAGES

- Deodorizes rooms and surfaces.
- Immediate action due to the combination of surfactants and perfuming agents.
- Deep action due to microorganisms that can digest complex fats, oils, cellulose, proteins, starch, etc., and destroy the source of odours.
- Does not contain caustic soda.
- Highly stable and can be kept for long periods.
- Non-flammable product. Non-toxic, non-corrosive.

RECOMMENDATIONS FOR USE

For pipes, use **Microdor[®] Pro** neat, pour (20 – 50 ml) in each drain or toilet affected by problems of bad smells. Allow the product to act for 5-10 minutes and then run the water.

To deodorise textiles, you can also use the product neat or diluted in water at 10–20%, with a spray application.

To treat waste containers, apply diluted to 10 - 20% and focus on the walls of the container.

As in all anti-odour treatments, the use of **Microdor[®] Pro** should be increased the greater the accumulation of residue to be treated or the intensity of the odours to be removed.

Microdor® Pro can also be used to clean surfaces affected by residues/smells, when diluted in water in the proportions given above.

Once dissolved in water, the product should be used within a maximum of 24 hours.

CHARACTERISTICS

- | | |
|--------------------|-------------------------------------|
| – Appearance: | Milky white liquid |
| – Odour: | Perfumed |
| – pH: | 6.0 – 8.5 |
| – Bacterial count: | 10 billion microorganisms per litre |

SAFETY

See product safety information sheet.

PACKAGING

Boxes containing 12 one-litre bottles.
Each box contains 3 sprays.
